Our Qualifications

Our team brings over 35 years of combined sustainability and strategy development experience with diverse clients across a variety of global sectors including **healthcare, power, lighting, water, transportation, renewable energy, aviation, appliances, remediation, advanced materials, and additive manufacturing**. Our experts are highly trained and professionally certified, with technical engineering backgrounds; proven, tiered communication approaches; and demonstrated practice in life cycle assessment, eco-design, and life cycle costing. We are creative, innovative thinkers able to conceive practical and impactful solutions in emerging areas such as circular economy, zero waste, net positive, sustainable development goals, biodiversity and much more.

Our Commitment

Because we are passionate and purpose-driven, we are committing to give back and doing good as a company. Aspire Sustainability is a proud member of [1% for the Planet](#) with foci on key areas of giving including climate change, natural resource conservation, biodiversity, water, and global social programs. We volunteer in our communities, hold leadership roles in non-profit organizations, and collaborate with a variety of academic institutions. Additionally, we foster a healthful work-life balance by encouraging wellness inside and outside the workplace.
